

January 17, 2017

The South Bend Clinic is pleased to offer **free vision screenings for incoming class of Kindergarteners**. As you know all students entering Kindergarten must have a vision screening before attending school. From **April through September we will test vision, eye alignment, binocularity, and basic ocular health** as part of our vision screening service. If the screening shows a need for further comprehensive testing or a need for glasses we will inform the parents and make appropriate arrangements to provide additional service if they desire.

We are located at the **South Bend Clinic, 211 N. Eddy Street** on the corner of Eddy and LaSalle Street.

Dr. Marcia Suvelza, our optometrist, performs our vision screenings. She has an undergraduate degree from Indiana University and her doctoral degree in Optometry from Indiana University School of Optometry. Dr. Suvelza can assist students and their families with any eye-related questions or concerns. Please feel free to distribute the enclosed cards and information to your new students and their families.

Please call us at **574-237-9334** if you need additional information.

Sincerely,
South Bend Clinic-Visions Department
